

Caregiver Services

Caring for a parent or loved one is hard work...

GROWING IMPACT

There are over 40 million Caregivers in the U.S.*

*National Alliance for Caregiving & AARP (2015)

LONG DISTANCE

65% of Caregivers live more than 20 minutes away from their loved ones

LACK OF SUPPORT

Caregiving is stressful, and many Caregivers feel they have to do it all on their own

WORK SUFFERS

68% of Caregivers said they've had to leave work or take on fewer responsibilities at work

CARE COORDINATION

Coordinating care for loved ones who need multiple care providers can be difficult

Now, Teladoc can help.

Two- and three-way visits through Teladoc's Caregiver Services support your employees and their families.

CARE

Support your employee Caregivers with resources to help care for their loved ones

ACCESS

High quality, affordable & convenient care for the entire family (not just dependents)

CONVENIENCE

Reduce stress, save time and money, & increase productivity

Teladoc for the whole family

Members can use Teladoc on behalf of, or with, a loved one, parent, or other family member they care for as part of their existing Teladoc account.

CARE

- Caregiver Services allows Teladoc members to add family members not covered by their health insurance plan.
- Care recipients are able to receive the same services that Teladoc provides for non-emergency care.
- Teladoc's three-way visit option means Teladoc members can be a part of their family member's care.

ADD & AUTHORIZE

- To add a care recipient, the Teladoc member logs in to their account and adds the family member(s) they're caring for.
- Then they will upload any legal documents required, or, have the care recipient authorize them as a Caregiver.
- Once completed, either the Teladoc member (Caregiver) or care recipient can request two- or three-way visits, and talk with a doctor by phone or video.
- The cost for either a two- or three-way visit is always \$45.

TREATMENT

- A prescription can be sent to the care recipient's pharmacy of choice, if medically necessary.
- Caregivers can share visit summaries with the care recipient's primary care physician and other providers.
- Caregivers can access the care recipient's record for any follow-up needed.
